

Upcoming dates

17.09.2026	Bachelor Cocktail Evening
17.09.2026	Fachschaftstag
19.09. – 22.09.2026	Game-Jam
22.09.2026	Bachelor Game Night
24.09.2026	Bachelor Pub Crawl

Minutes of the FSR session on 16.09.2026

Begin: 6:17 PM

End: 7:23 PM

Attendees: Hannah Scholz, Paul Robaschik, Simon Korswird, Marie Recktenwald, Claudia Plaza Morales, Ben Huber, Peter Kempnaers, Florian Jäniche, Emma Zenker (until 6:46 PM), Jan Malmström, Leo Papenhausen, Matias Viner, Frederik Schneekloth, Zoé Karl, Nik Scheer, Roxana Mittelberg, Julian Henseler García (from 6:21 PM)

Head of the meeting: Roxana Mittelberg

Keeper of the minutes: Jan Malmström, Hannah Scholz, Florian Jäniche, Claudia Plaza Morales

AI 0: Hi & Minutes (6:17 – 6:23 PM)

Roxana begins the meeting, today's meeting is in English. We start with an introduction round. Roxana explains our hand signs.

Last week's minutes were sent around. We pass the minutes.

AI 1: Reports (6:23 – 6:28 PM)

FK It took place on Monday. "Be Strong" will soon kick off its next round, we are invited to advertise it. There is no alternate date yet for the Awareness workshop; it will likely be in early to mid October. The town hall meeting with the Rectorate next semester is on February 1, 2027. The AStA's supplementary budget plan was reviewed. Nothing too exciting, but as a result, social spending will be increased. Specifically this fraction of the semester fee will increase from 50 cents to 2.10 € in the upcoming summer semester and then to 1.30 € in the long term. The N8chtschicht is closing very soon. Some parties organized by other student councils have been canceled, but the operator is very motivated to organize alternative venues. We should take this into account when organizing parties in the future.

Master-Information Is almost ready. You can read it and any feedback by next Wednesday is very much appreciated.

Deleted Messages An invitation to a party (where we couldn't figure out who was organizing it) was deleted. Ben thinks the party might be organized by a commercial firm.

A second message was deleted and the person was removed from the group. The removed person also doesn't study Math.

AI 2: Bachelor first-years' (6:28 – 6:34 PM)

The preparatory course for first-year Bachelor's students started on Monday.

Campus Tour and Welcome-Evening Took place on Monday and went really well.

Game-Night Took place yesterday, also went really well.

Awareness-Team Will be advertised better in the coming days.

Cocktail-Evening Takes place tomorrow, we are looking for shifts.

Game Night Next Tuesday. We are still looking for shifts and in particular Awareness people. Paul remarks that the FSV on the same day at 4 PM hopefully finishes in time.

Bar Hopping Takes place next Thursday. We are still looking for guides and Awareness persons.

First-Years' Trip You can now register for the first-years' trip at the end of October, do not pay the fee yet, the first-years' department will decide after the registration process finishes how many people from the Fachschaft will be able to go on the trip.

AI 3: Events (6:34 – 6:53 PM)

Office Hours We are still missing a person for Monday, Flo volunteers. Jan will join him.

AI-Event Related to the rapid evolution of AI and its application in mathematics, many fears arise. Matias brings two proposals for events, a panel event with professors and people involved in research, to get to know their opinions. Alternatively we could conduct interviews with different professors and publish them later on.

Simon explains there will be a formal event from the Examination Board to review what AI's development means for university. Simon and Roxana also plan an open discussion for students to get to know their opinions on how AI is affecting teaching Math.

Hannah believes that what Matias proposes is a good idea, but intensive in organization, as there's going to be a lot of debating. She advocates to go to Post Docs as they'll share the same fears as Master students.

Matias wants to collect information on this topic from people in teaching and share it with everybody and wants to know what's the best way to do that. Hannah believes either option is doable. Roxana believes in either case many people would be interested in the outcome of the project. Hannah thinks the first step is to collect people who are interested in collaborating with the idea. Matias thinks the interview could cover different areas, such as how people in teaching use AI in their work, what do they expect from students when using AI and maybe their points of view on the impact of AI in the future. Simon reflects on who he'd send the questionnaire to and doubts whether most of the people in teaching would answer the E-Mails. For the interview part, he suggests to approach a few more student-friendly professors and offer to talk and "publish" the results. If an event/discussion is organized, he suggests to narrow the topic down, as AI is a huge topic of discussion and there's no time to cover them all in one sitting. Matias believes it would be beneficial to get a vast pool of people teaching in different areas, as AI impacts each area differently.

Roxana sums it up: We are interested in organizing such event. Jan, Paul, Hannah, Julian and Matias would be interested in planning this event. You can join the Signal group here signal.group/#CjQKIBH7Ek_ODMieC6XGoFYdIR1cM6HQIfqZyA-10YMgXQGREhB0-g5WTl4TGI6_A8wwnCIS.

Game Jam takes place this weekend on 19th – 22nd September.

AI 4: AI and Studies (6:53 – 7:09 PM)

The idea is to collect a rough plan of this event. Simon explains that the goal of this agenda point here is to find the questions we need to discuss, so that we can get discuss them with students and afterwards try to act on it, for example adapting the requirements for being admitted to do the exam. There aren't regulations yet on it, so we also want to know what those could look like in the future.

Use of paid models Hannah would like to discuss the monetary aspect of AI. The difference between paid AI-models and the free ones is huge and she would like to know what impact that has on equality and if we have different opinions about the use of paid vs. free models.

Tutorials for AI Simon asks if we want tutorials on how to properly use AI as a tool for studying maths. Claudia thinks we should, an AI can perfectly produce a solution, but the important skill is to come up with the solution yourself and the way there rather than the end result. Matias personal goal with the event of before is also to produce some guide-line for people in teaching so they can decide what's better for students.

Right for AI-free studies Hannah believes we should also talk about if there should be a right of AI-free studies, as professors may come up with exercises that only can be solved with AI and that's something we may not want to support. Especially the workload should still be doable without using AI.

Admission process for exams We should talk about how the admission process for exams should look like, as you could just hand in AI-made solutions.

Programming Roxana asks what we do with classes that teach you programming.

AI-Detection tools Hannah suggests that we also talk about whether we are okay with professors using AI-detectors on our work and drawing conclusions from the results.

AI for correcting work-sheets We should discuss which guidelines also apply to the professors correcting work with AI.

Copyright issues with AI ¹ Nik suggests we should discuss if TAs and professors have the right to refuse that their exercise sheets are feed to AI by the students.

Correcting sheets Hannah remarks that maybe tutors should be allowed to refuse blatantly AI-generated homework. Claudia thinks it's hard to draw a line there.

Thesis Roxana asks whether if AI is allowed to work on your thesis, that will create an imbalance between universities.

We have collected some ideas what people could/should talk about in an upcoming event. If you have any other ideas, share them with Roxana or Simon and they will add it to the list.

Roxana asks who is interested in organizing this event. Lou is interested. Matias and Hannah are too.

¹Trust Navier-Stokes wasn't stolen.

AI 5: Public Relations (7:09 – 7:16 PM)

Date Poll Felina wants to do a meeting for the PR-Department². Felina would like more people helping in the department. She is organizing a meeting to talk about which issues are going on in the department and sort which tasks can be completed by whom.

Additionally there will be a meeting³ to rewrite our “Kommunikationsrichtlinien” (communication regulations) and maybe also translate them to English. Roxana would be very happy to have some support. Zoe could help.

There are some convoluted old regulations from FSV and FSR on what may be advertised by the PR-Department. Roxana wants to structure that better and collect all the decisions in one place.

BeStrong Felina wants to advertise BeStrong in the community.

Women in Technology Munic Felina would like to advertise the event through the News/Opportunities/Events group and the Women*-group. We are very happy with that.

Loo-Paper The deadline for the October loo-paper is on 18th September, which is this Friday. Jan adds that if there are good quotes/parts from interviews from the AI-project they would be perfect for the loo-paper.

AI 6: Miscellaneous (7:16 – 7:23 PM)

PhD-Bonn Hannah wants an E-Mail-address for the PhD department, we support that. There is a new PhD-WhatsApp-Group which is part of the Community.

FSV Takes place next Tuesday at 4 PM. There are some open positions in different committees. You can drop by if you are interested. There is an open appointment committee for a new professorship⁴ and we need people to organize our next FSV-election in December. But there are also more open positions.

Fachschafftstag Tomorrow at 9 AM until we are done (which is before 4 PM). We want to clean out the office and do other work that has been lying around for some time. Come by if you can to help! If you have personal stuff in the office it is at risk of being thrown away and should be removed before tomorrow morning.

KoMa95 The KoMa95 is the same weekend as the first-years' trip. The registration period for the KoMa is ending in two weeks, if you want to join either one, decide it by next week, so we can decide who goes where. If you want to go to the KoMa95 join the Mattermost Channel.

Awareness-Workshop Is on Sunday starting at 10 or 11 AM (people registered will receive an E-Mail with the details), there are a few spots left, so if you decide you want to take part, text Sophia, Ludwig or Roxana.

Roxana closes the meeting at 7:23. Thanks everyone for being here.
