Be good, donate blood!

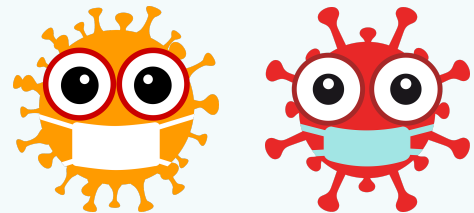

From 26.10. to 06.11. the annual Vampire Cup will take place at the University Hospital Bonn on the Venusberg. There you can help Bonn win the international competition by donating blood. [Here](#) you can get more information. Since donating blood is a good thing by which you can help people with little effort at any time, you can find more information on blood donation on the Venusberg in general [here](#). Be brave and do something good!

KoMa in Bonn

The student council has decided to host the KoMa (conference of german-speaking student councils) in summer term of 2021. Originally, we had planned to organise it this summer, but the pandemic kept it from happening. During some week in May, students from all over Germany will travel to Bonn to discuss various things related to university politics and our studies. For this, a lot has to be planned, like for example shelter and infection protection. If you are interested and willing to lend a hand, we could gladly use your help!

AHA!

We as the student council want to appeal to all students to conform to corona regulations. We are sorry that we had to cancel the few events we had planned in presence and we would really like to see all of you face-to-face again. Considering the rising number of infections though, it is important for every-one to not unnecessarily endanger others. Therefore keep in mind: distance, hygiene, face covering – and please no illegal parties.

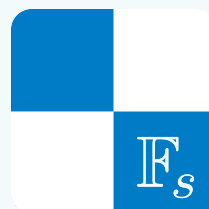

Riddle of the month

On a certain island there are two groups of people: One always tells the truth, the other always lies. Currently there is a peculiar virus running rampant. Everyone who catches it now acts as if belonging to the respectively other group (liars are honest, honest people lie). How can you find out to which group someone belongs with only one question? The solution will be on the next Loo Paper.

Solution of last months riddle:

In both scenarios you only need one move. In scenario 1 you can lift the second glass from the left, pour its content into the second from the right and put it back to its original position. In scenario 2 you can lift the glass in the middle, empty it and put it back down.
