Events

The sun comes around and the summer finally starts thus we have quite a few events planned for you! On the 4th of June at 19 o'clock we invite you to our cocktail evening in the Annex. On the 7th there will be a game night and a flunkyball tournament on the 13th. Further information can be found on our website (fsmath.uni-bonn.de) in time.

On the 3rd of July there will be free waffles in the student council office all day long. We look forward to seeing you.

Mental Health

Is everything too much for you at the moment? Do you have private problems outside of your studies that are putting a strain on you? Then the university's psychological counselling centre can help you. After making an appointment, you can get help there, either in a personal conversation on site or on the phone. If necessary, you can also be referred to other counselling and therapy services. You can find more detailed information at: tinyurl.com/fsmentalhealth.

Furthermore we, the department for mental health of the student council, invite you to our next "Group Talk" on the 3rd of June in N0.007 and N0.008 at 18ct! This time around we will focus on academic pressure within your studies.

On the 9th of June, the European elections take place. Go Vote!

Math with Pride

Hello! We, the LGBTQ+ department of the student council, would like to invite you to share your thoughts and discuss with tea and cookies. We call the event „Math with pride“ and it will take place in the Lipschitzroom of the Math Centre on the 24th of June from 2:30 pm to 5 pm. Although this event aims to focus on being queer in math, everyone is welcome to attend and learn. As some of the topics of discussion may be sensitive, we ask everyone to be kind and respectful and to help us keep this event safe for all participants.

See you soon! Your LGBTQ+ department

Summer festival

On 28th June from 4pm, this year's summer festival will be celebrated on the lawn behind the Maths Center in cooperation with the entire Mathematics. There will be various games, popcorn and drinks at cost. Additionally, there will be a barbecue, with side dishes provided by us. Please bring your own food and contribute to the salad and dessert buffet. Family and friends are also welcome!

Joke of the month

What's a swimmer's favorite math?

-Dive-ision

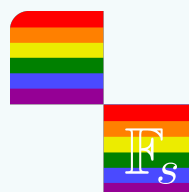

Riddle of the month

A square has a quarter in each corner. Louis is blindfolded and must get all quarters to be heads up or all to be tails up. He will be told when he has done this. He may flip however many times he wants, then ask if he is done (this constitutes a turn). The square is then rotated/spun an undisclosed number of times. Louis then gets another turn and so on...Is there a strategy that is guaranteed to work in a finite number of moves, and if so, what is that smallest number of moves one needs to be 100% one will be able to have all heads up or all tails up?

The solution will be on the next loopaper.

Solution to last months riddle:

Jan could have listened to 31 songs the most.
