Calendar

- 06.02. End of lecture period
- 12.-18.02. Carnival
- 14.02. Valentines Day
- 08.03. International Women's Day
- 03.-06.04. Easter
- 13.04. Begin of lecture period

Exams?

If you have any questions or concerns, you are welcome to come visit us during our office hours (Tuesdays and Thursdays 12-14) or write us an email to info@fsmath-bonn.de.

Revision courses

There will be revision courses during the lecture-free period. These are designed to give you the best possible preparation for the second exams with summaries of the material and all kinds of exercises. Currently, the following courses are planned: Ana I, LA I, AlMa I, GdM I, EinfAlg, Ana III, WTheo, Numerical LA and Topo I. You can find further information and changes (like times and location) on our website: fsmath.uni-bonn.de/en/studies/repetitorien.

We wish you good luck for the upcoming exams!

Wanted!

You have written a good thesis, a portfolio for your practical teaching course or have had an oral exam? We would like to add your notes to our collection as a guide for other students. Please send it to info@fsmath-bonn.de. Further information regarding minutes of examination can be found at fsmath.uni-bonn.de/en/studies/pruefungsprotokolle. Scripts – self-written or released by a lecturer – are also welcome. Also, in case you need anything, feel free to visit us!

Blood donation

You've got some spare time and do not suffer from iron deficiency? Go donate blood! From Monday to Friday you can donate blood in exchange for a small compensation of 25 Euro and a small snack in the University Hospital Bonn which helps the clinic immensely. Appointments

can be made per call or via the clinic's app, check out the [website of the UKB](#). The latest information and a (preliminary) check if you are fit to donate as well as other requirements can be found there. You can also donate without an appointment on Wednesdays between 11am and 2pm in the anatomy in the Nußallee. Donate! It is a bloody good job.

Joke of the month

A mathematician is in job interview. She's asked: "You're late for a meeting, when you come across a burning house, a fire hydrant, and a fire hose lying across the street. What do you do?"

The mathematician responds: "People's lives are more important than the meeting. I screw the fire hose into the hydrant and put out the fire before coming to the office."

The interviewer is impressed, but asks her a followup question just to make sure: "You're late for a meeting when you pass a fire hose connected to a hydrant, next to a perfectly safe house. What do you do?"

The mathematician thinks for a moment, then replies: "I unscrew the fire hose, carry it across the street, and set the house on fire. Then I've reduced it to a problem I've already solved."

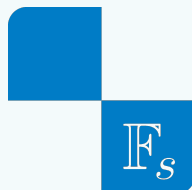

Riddle of the month

In a prison, there are four persons, three of which are standing in a row, such that they can see the persons in front of them, and the fourth person stands entirely isolated in a neighbouring room. A guard puts two red hats and two blue hats on their heads. If one of the persons says their own hat colour, they're all free. What should they do?

The solution will be on the next Loo Paper.

Solution to the last riddle:

Jan can force who writes the 6 on the board. Depending on the existence of a winning strategy that involves writing a 6 on the board, Jan writes the 6 (or not). Hence, Jan can force his win.
