Welcome Master-Fresh(wo)men!

Welcome to Bonn! We, the “Fachschaft”, will be organising events for you to make the start of your Master’s easier and more fun. We are planning various events for you, so you can get to know other Master’s students. We start with a Master Welcome on the first day of lectures (13 April at 18 c.t.) and a wine and cheese evening on the following Thursday. At the wine and cheese evening you can buy wine from us for small prices and we provide the cheese and baguettes. On the first weekend we have planned a hike on Sunday (provided the weather plays along). For this we meet at 10 at the tram station “Königswinter Fähre”. On the next day we will go to the WOKI cinema together for the Sneak Preview and we will hit the town on our Master’s pub crawl. You can find more details about the events on our website or in the WhatsApp groups! Be sure to check out the Master information – you’ll find lots of helpful articles there. We look forward to seeing you at our events and wish you a great time at university!

Your Master’s department

$\LaTeX$ Course

Do you want to brush up on your $\LaTeX$ skills or learn how to use $\LaTeX$ from scratch? Then we have some good news! We are once again offering a $\LaTeX$ course this year to help you create lecture notes, organise your assignments neatly, or write up some minutes. The $\LaTeX$ course will take place from 7–10 April in the Alfred Philippson Lecture Hall in the Geography Building, at Meckenheimer Allee 166, daily from 10 am to 4 pm.

Feminism & Handicrafts

Does the idea of doing a craft project while listening to a feminist lecture sound appealing? Then there’s just the right event for you: On April 16 at 14 s.t. in Room 0.016 of the Computer Science Center, Dr. Sinah Kloß from BCDSS was invited to kick off the new event series “Feminism & Handicrafts”. In her lecture “Who Works, Who Crafts? Gender, Capital, and the Construction of Value in Craft, Handicraft, and Art”, she examines how activities are socially categorized and hierarchized along gender lines. At this event, you’re welcome to bring your own craft project and work on it alongside the lecture, though it’s certainly not a requirement. At the end of the lecture, you are welcome to stay in the room for a while to exchange ideas and share skills. The event is organized by the GIDIS.

Accessibility

Unfortunately, studying at the MNF has often not been accessible to everyone. If you notice any accessibility issues in our faculty’s buildings, please report them (anonymously) via the link below so that things can change in the future!

Bike market

On Saturday, 25 April 2026, there will be a second-hand bike market in front of the Kreuzkirche (Kaiserplatz 1) from 11 am to 2 pm. The perfect opportunity to buy a bike, sell your used bike or parts thereof if they are still usable! Find out more at asta-bonn.de/en/services/consultations-and-services/bike-market.

Riddle of the month

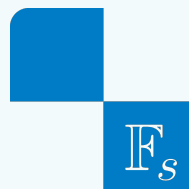

There is an $n \times k$ chocolate bar. The top-left corner piece is poisoned. A move consists of breaking off a non-empty sub-rectangle that contains the bottom-right piece (regardless of whether it has already been removed or not). The player who has to take the poisoned piece loses.

Which player can secure victory?

The solution will be on the next Loo Paper.

Solution to the last riddle:

If the person at the back of the line doesn’t immediately say a colour, the two people in front of them will have different colours. In that case, the person in the middle of the line will immediately realise that they have a different colour to the person in front of them and will say that colour.
